+98933 247 8399

Summary

Front-end motivated developer proficient in HTML, CSS, JavaScript, React.js, and Next.js. Although I have no formal work experience yet, I have the skills to create fully responsive and user-friendly websites. Through independent projects, I've successfully implemented features commonly found in real-world applications using tools like TailwindCSS and MaterialUI. A quick learner and eager to contribute to impactful digital projects and seek opportunities to help others and develop my skills.

Projects & Portfolio

2025 — Diginewz ● Developing

A blog website for sharing and managing categories, posts, comments, etc.
Functionality: User authentication, admin/user panels, post management, comments and categories.
Front-End: Built with Next.js 14 and server-side components for high performance and efficiency of the application. Designed with Tailwindcss and custom UI components. TypeScript is used for type safety and error handling. Zod is used for data validation, React-Hook-Form for form handling and Tanstack-Query for server-side state management.
Back-End: Built with Node.js and Express.js frameworks. MongoDB Atlas is used for database and Mongoose for ORM.
Role: Front-end development
Challenge: Learning to work with and manage real-world APIs

2024 — Snapgram ● Developing

Snapgram is a social media platform for interacting and sharing photos and videos.
I collaborated with a backend developer to build a full-stack project with React.js as the frontend and Laravel as the backend.
Functionality: User authentication, post creation/editing, media uploads, search, notifications, and following system.
Front-End: Built with React, react-router-dom for SPA routing, Context API for state management, and styled with TailwindCSS and ShadCN UI. Utilized React Query for optimized server-side state management, Zod for data validation, react-hook-form for form handling, and react-helmet-async for SEO.
Back-End: Laravel framework (PHP) with MySQL database for data storage.
Role: Front-end development
Challenge: Learning teamwork and time management
